

## Quality Facilitator x3 - Penrith

We currently have a vacancy for quality facilitators at the Penrith site.

You will help to facilitate the quality within the production facility – KPI's will include monitoring rework, waste reduction, product quality and finished goods inspection.

This key role is responsible for helping the production lines produce a quality product and help reduce rework and scrap, the position will be to work alongside the shift management and staff to help ensure a good quality product is produced.

This position has a wide range of responsibilities including quality inspection, final product inspection, working alongside existing crews to help resolve quality issues. You will therefore need to demonstrate strong leadership and people management skills as well as sound organisation and communication skills.

This position works on a shift basis and candidates must be willing and able to commit to any of the shift patterns operated on site.

Excellent prospects exist for the right candidate who has the drive and determination to succeed.

Please apply as detailed below, having first advised your line manager.

**Closing Date for Application: 17/02/2012**
